

# Fungus Model

S. M.  
And  
R. A.

# WHAT IS THE PROBLEM?

How to identify different fungi species

How to study fungi structure and morphology

# WHY IS THE PROBLEM IMPORTANT?

We have good fungi (bread, mushrooms)  
and bad  
fungi (Alternaria which causes allergies and  
asthma)

We need to know the differences.

# HOW ARE WE HELPING?

By giving examples of fungi by building models.

If we build models the computer will help understand fungi.

# THE MODELS WE DEVELOPED
