

# Modeling Rice

A. R.

H. T.

# What is the problem?

- Food security
- Tolerance of plant to disease
- Improving the nutritional value of rice

# Why is it important?

**Food Security:** There are a lot of poor people that don't have food to eat

**Plant Tolerance:** It's important that plants are resistant to diseases

**Nutritional Value:** It is important to have a good nutritional value in order to be healthy

# How are we helping?

By creating a 3D model that represents different species of rice
