

# 3-D Rice Modeling

R. S.  
S. W.

# What is the problem?

1. Rice needs to produce more seeds.
2. Rice can get diseases.
3. There are a lot of hungry people.

# Why is this important?

1. More seeds will cause more rice to grow.
3. Diseases can kill the rice.
5. Rice can fill hungry people's stomach.

# How are we helping?

1. We are making models of rice
2. Scientists can use the models

# The models we developed
