

3-D Rice Modeling

R. S.
S. W.

What is the problem?

1. Rice needs to produce more seeds.
2. Rice can get diseases.
3. There are a lot of hungry people.

Why is this important?

1. More seeds will cause more rice to grow.
3. Diseases can kill the rice.
5. Rice can fill hungry people's stomach.

How are we helping?

1. We are making models of rice
2. Scientists can use the models

The models we developed
